

ZAINAB NAEEM

Full-Stack MERN & Next.js Developer

+92 3371633388 • zainab.hina05@gmail.com • github.com/zainabhina05-png • linkedin.com/in/zainab-naeem512 • Fsd, Pakistan

PROFESSIONAL SUMMARY

Full-Stack MERN & Next.js Developer (5th-semester Software Engineering student) with production experience building, testing, and debugging fast, responsive, mobile-first web applications using React.js, Next.js, TypeScript, Node.js, Express.js, MongoDB, and Tailwind CSS. Delivered Yalla (live e-commerce platform), LeadFlow (full-stack CRM), and Logpose (interactive 3D web app with Three.js), integrating REST APIs and third-party services with secure JWT authentication. Skilled in Agile/Scrum workflows, reviewing and evaluating code for quality and correctness, and debugging/resolving issues across the front-end and back-end, with hands-on use of AI-assisted development tools. Active open-source contributor with 107+ merged pull requests and strong Git/GitHub version control practice; known for clear technical communication, structured problem-solving, and attention to detail.

TECHNICAL SKILLS

Front-End: React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, SCSS, Vite, React Router, jQuery, Responsive/Mobile-First Design

MERN / Back-End: MongoDB (Mongoose), Express.js, React.js, Node.js, REST API Design & Integration, Next.js API Routes, JWT Authentication, Webhook Integration (HMAC-SHA256)

3D & Animation: Three.js, React Three Fiber (@react-three/drei), GSAP, C++, C#, SFML (Game Dev)

Databases: MongoDB, MongoDB Atlas, Snowflake, MySQL

Testing & Tooling: Jest, Supertest (Unit & Integration Testing), Postman, Winston, Morgan

Languages: JavaScript, TypeScript, Python (Beginner), C, OOP, DSA (Data Structures & Algorithms)

Tools & Practices: Git, GitHub, VS Code, Docker, Vercel, Agile/Scrum, Code Reviews, Debugging & Bug Fixing, CI/CD Deployments, AI-Assisted Development (Cursor)

EXPERIENCE

Open Source Contributor — Elite Coders: Summer of Code 2026

2026 – Present

- Ongoing contributor to a fast-moving open-source MERN codebase, merging 107+ pull requests that resolved production bugs, refactored legacy components, and strengthened React component architecture, Tailwind CSS UI consistency, and cross-browser/responsive behavior at scale.
- Reviewed and evaluated incoming pull requests for code quality, correctness, and adherence to best practices, leaving structured, actionable feedback that helped less-experienced contributors ship cleaner code faster.
- Collaborated daily with maintainers and a distributed contributor team inside Agile/Scrum sprints triaging issues, prioritizing fixes, and keeping the codebase consistent as the project scaled, with hands-on use of AI-assisted tooling to speed up debugging.

MERN Stack Developer (Front-End Focus) — Tech Hub Innovation, Faisalabad

2024

- Built, tested, and deployed full-stack production applications end-to-end (MongoDB, Express.js, React.js, Node.js), owning everything from MongoDB schema design to front-end debugging, Next.js/Tailwind CSS UI work, and REST API integration for dynamic, data-driven pages.
- Developed Yalla, a live, large-scale UAE-based e-commerce platform, architected reusable React components, REST API integrations, and MongoDB schemas, and implemented SSR/SSG with Next.js; the live storefront's real-user Interaction to Next Paint (INP) measures 68ms, well within Google's 200ms "good" threshold, improving front-end responsiveness and SEO discoverability.
- Worked directly with the client and a small dev team to debug and optimize the storefront post-launch, resolving cross-browser rendering and mobile-responsiveness issues on a live production site handling real customer traffic.

PROJECTS

Yalla E-Commerce — React.js · Next.js · Node.js · MongoDB · Tailwind CSS

- Live production e-commerce platform for a UAE client. Live: <https://yalla-commerce.com>, built and optimized a responsive, SEO-friendly storefront with Next.js and Tailwind CSS, using SSR/SSG to improve performance and load times.

Logpose — Gamified Passion Tracker — Next.js 14 · React · Tailwind CSS · Three.js · React Three Fiber · Snowflake

- Hackathon project (DEV Community Weekend Challenge) designed and developed an interactive 3D compass, passion-score tracking, and achievement badges; Snowflake backend with JWT authentication. Live: <https://logpose-brown.vercel.app/>

LeadFlow — CRM Platform — React · Node.js · Express · MongoDB · Vite · JWT

- Built a production-ready CRM featuring a drag-and-drop Kanban pipeline, real-time analytics, role-based access control (RBAC), and webhook integrations; validated with 43 Jest/Supertest unit and integration tests. <https://client-cyan-rho.vercel.app/>

How_Ball — 3D Endless Runner — Next.js 15 · React 19 · Three.js · Zustand

- Built a live WebGL 3D browser game from scratch, engineering custom physics and an ECS-based (Entity-Component-System) architecture. how-ball.vercel.app

WordForge (WordleForge) — Infinite Word Puzzle Platform — Next.js · Clerk · Prisma · Neon (PostgreSQL) · TypeScript

- Built and shipped an infinite word-puzzle platform (50,000+ word dictionary) with three modes; Classic, Daily Challenge, and Time Attack plus win-streak tracking and global leaderboards; implemented secure Clerk authentication and Prisma/Neon (PostgreSQL) persistence for user accounts and stats.
- Strengthened application security through API rate limiting, an authentication-boundary audit, and npm dependency vulnerability patching. Live: wordle-forge.vercel.app

LEADERSHIP & AFFILIATIONS

Community Influencer — Microsoft Student Ambassador Program

2026 – Present

- Contribute through technical content creation, event promotion, and campus outreach, communicating technical concepts clearly to a broad student audience.

Ambassador — National Incubation Center Faisalabad (NICF)

2026 – Present

- Selected as Campus Ambassador for NICF's ambassador team, representing the incubation center's programs and initiatives on campus.

Member of Cohort — Summer Upskill Series, AtomCamp × GDG on Campus (IM Sciences)

2026

- Completed a multi-track upskilling program covering personal profile/brand building, web development, LinkedIn optimization, freelancing fundamentals, agentic AI workflows, and AI image generation.

EDUCATION

B.Sc. Software Engineering — University of Faisalabad | CGPA: 3.89

2024 – Ongoing

CERTIFICATIONS

- Claude Code 101 — Anthropic
- Microsoft Azure Fundamentals (AZ-900) — Microsoft
- Generate Reports with AI — Microsoft Applied Skills
- Prompt Design — Coursera / Google
